To Whom It May Concern:

I am writing this letter on behalf of the Arthur Chamber and its members as a letter of support for construction that is being approved for Highway 6 in Arthur. We at the Chamber are thrilled to hear that we would be getting a renovation in the town especially the streets. As you may be aware with the recent drive of the Chamber, revitalization Committee and the inauguration of the BIA, Arthur has been passionately looking to progress through changes to improve the core of the town. This renovation of the streets will surely be a step towards that positive direction that we are seeking.

We are also letting you know that if you have any questions or concerns about any business input, we would gladly like to sit down with councilors and with the engineers. Along with the BIA, we would like to present opportunities that may be available or possible during the construction. We are confident that the voice of the businesses would be beneficial in the long run, because concerns about construction and design met now would alleviate grievances later on or afterwards.

We are here to support you and our small town knowing full well the future changes coming and we are embracing every aspect of those changes. We understand that there will be bumps in the road during this construction (both literally and metaphorically) but we are here to support our businesses and the town and will continue to do so enthusiastically.

If you have any questions or concerns, Please feel free to contact myself or the Arthur Chamber for more information.

Thank you

Tom Gorecki
