

# Mount Forest Southeast Storm Drainage Study Survey Form

Please complete and submit to [infrastructure@wellington-north.com](mailto:infrastructure@wellington-north.com) by August 28, 2026.

| 1. Contact Information |                          |        |  |
|------------------------|--------------------------|--------|--|
| Anonymous:             | <input type="checkbox"/> |        |  |
| Name:                  |                          |        |  |
| Address:               |                          |        |  |
| Phone Number:          |                          | Email: |  |

| 2. Have you observed any of the following drainage issues withing the study area? |  |
|-----------------------------------------------------------------------------------|--|
| a. Flooding of private property                                                   |  |
| b. Flooding of roadways                                                           |  |
| c. Water overtopping driveway culverts                                            |  |
| d. Water crossing over roads                                                      |  |
| e. Standing water for extended periods of time                                    |  |
| f. Erosion                                                                        |  |
| g. Culvert blockages                                                              |  |
| h. Ice or snow-related drainage issues                                            |  |
| i. Other                                                                          |  |

| 3. If you have observed drainage issue (s), please indicate the location(s): |
|------------------------------------------------------------------------------|
|                                                                              |
|                                                                              |

| 4. Under which conditions do drainage issues typically occur? |  |
|---------------------------------------------------------------|--|
| a. Spring (melt)                                              |  |
| b. Spring (storm)                                             |  |
| c. Summer/Fall (storm)                                        |  |

|                                                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>5. Are there any drainage concerns that you believe were not identified and presented in the memo shared with the residents?</b> |
|                                                                                                                                     |
|                                                                                                                                     |
|                                                                                                                                     |
|                                                                                                                                     |

|                                    |
|------------------------------------|
| <b>6. Any additional comments:</b> |
|                                    |
|                                    |
|                                    |
|                                    |
