

NOTICE OF STUDY COMMENCEMENT

TRANSPORTATION AND MOBILITY MASTER PLAN STUDY TOWNSHIP OF WELLINGTON NORTH

THE STUDY:

The Township of Wellington North is developing a Transportation and Mobility Master Plan (TMMP) to guide long-term transportation planning and infrastructure investment to 2051 and beyond. It will establish a long-term vision for a transportation network that better serves residents, businesses and visitors while supporting a range of travel modes.

The TMMP will assess existing and future transportation needs and identify opportunities to improve the safety, accessibility, connectivity and efficiency of the Township's transportation network. The study will consider the road network and future road connections, sidewalks, trails and active transportation opportunities, truck bypass corridors, unopened rights-of-way, municipal parking, accessibility, and structural improvements to accommodate growth.

THE PROCESS:

The study is being undertaken as an Approach No. 1 Master Plan in accordance with the requirements of Phases 1 and 2 of the Municipal Class Environmental Assessment (MCEA) process, an approved process under the *Environmental Assessment Act*. The study will include:

- **Phase 1:** Identify and define the transportation problems and opportunities; and
- **Phase 2:** Identify and evaluate alternative solutions, consider potential environmental effects and input received through consultation, and identify preferred solution(s).

WE WANT TO HEAR FROM YOU:

Consultation and engagement with the public, Indigenous communities, stakeholders, and regulatory agencies are a key component of this study. Two rounds of consultation, including Public Information Centres, will be held over the course of the study to gather input on existing transportation issues and opportunities, potential solutions, and the recommendations of the TMMP. Details regarding consultation opportunities will be provided as the study progresses.
